

Zerk

Zerk is a retro futuristic display typeface built on calligraphic roots, exaggerated widths, and a pre-millennial flair. Its structure pairs sculptural curves with a constructed geometry, creating a balance between flow and exaggeration. The typeface frames a future imagined with optimism, joy and mischief rather than ambitious progress.

Version 0.3 includes normal and condensed widths, eight weights, from Extra Light to Black, and supports Basic Latin character set with figures and some punctuation. Also, variable font support. The Zerk family is planned grow towards a bigger character set, italics, and definitely lots more.
